Collecta 2021 Collection

A natural world in miniature

2021 Collection

A natural world in miniature

COLLECTA

**Our Values**

Safety, attention to detail, authenticity and excellence.

**Our Vision**

To create the natural world in miniature.

**Our Mission**

To inspire a love of nature and sense of wonder at its discovery of creatures, through our range of authentically detailed, hand painted miniature animal figurines.

To stimulate creativity, through sensory play and imagination, and to encourage curiosity about the natural world - play, learn, collect, develop.

To bring to life the prehistoric world and foster an understanding of the evolution and extinction of species. To highlight the importance of protecting our endangered species and their habitat.

To bring the highest standards of craftsmanship, materials and safety to our collectable range. The play models are solid, safe in water, and dishwasher proof, ensure they are hygienically safe.

Horse Country

**Deborah McDermott**

Deborah is a sculptor living in Southern California. As a sculptor, she observes the anatomy, movement and expressions of horses as well as their unique qualities that make each horse an individual.

# Prehistoric World

## Anthony Beeson

2021 sees CollectA enter its fifteenth year of existence in producing models of Prehistoric fauna and flora. It continues in its mission to both educate and to provide the greatest amount of creative play with the accuracy of its models.

2020 proved to be a sad year for most of the world as a result of the Covid-19 pandemic. Any company depends on, and should be protective of its workforce. CollectA has done its utmost to ensure the safety of its people with stringent measures. The factory was closed for some weeks and professionally cleaned several times. Screens were erected between work-stations and an isolation hostel was established where workers returning from other parts of China could be quarantined for 14 days before re-joining their colleagues.

Notwithstanding the disruption in production, this year, in close collaboration with my colleague the sculptor Matthias Geiger, we have produced another varied selection of animals for CollectA's prehistoric animals series.

In CollectA's Popular series we offer a model of the recently discovered Late Cretaceous Japanese hadrosaur Kamuysaurus and a new model of the first dinosaur ever to be named, the British Mid-Jurassic theropod Megalosaurus – in ambush, to replace the existing one. Another replacement is a new idea of the British Early-Cretaceous theropod Neovenator, depicted as scenting prey.

In 2012 Collecta was the first company to introduce an innovative series entitled Dinosaur Prey and this year we add a figure of a dead Brontosaurus to the collection. The Japanese Late Cretaceous ammonite Pravitoceras joins CollectA's Prehistoric Sea Creatures range. Other Late Cretaceous sea creatures include, in the Popular range, North America's Elasmosaurus and, at our collectors' requests, a Deluxe model of the giant predatory fish Xiphactinus which we hope will find favour.

A new model of America's Early Jurassic theropod Dilophosaurus, incorporating recent palaeontological research, joins the Deluxe range as does an impressive version of China's huge Late Jurassic sauropod Mamenchisaurus.

The Late Cretaceous North American pterosaur Pteranodon joins CollectA's Supreme range for 2021. It has an articulated jaw.

The Prehistoric Animals range is joined by the South American, heavily armoured glyptodont, Doedicurus that lived during the Pleistocene and Holocene periods.

A new CollectA Box of miniature dinosaurs joins the existing range and a second series of the CollectA AR has been produced. Finally, for the first time CollectA has designed a Prehistoric Advent calendar.

Wishing you all a safe, happy and educational year of play and collecting.

## Matthias Geiger

Matthias is a German sculptor with a great passion for Dinosaurs. In collaboration with Anthony Beeson, he brings life to CollectA's vision of prehistoric animals.

All our models are individually hand crafted to the highest standards and made with only the finest and safest materials. As part of our ongoing product improvement program, we continually strive to improve and upgrade all our models in an effort to bring you the best possible collection. All our products are rigorously tested to ensure they meet the highest safety standards. We hope you enjoy our models as much as we have enjoyed creating them.

**Horse Country**

In Celtic and northern European folklore, the unicorn is depicted as a white horse-like animal with a long horn.

In the middle ages, it was commonly described as an extremely wild woodland creature, a symbol of purity and grace

**Celtic Family Symbol**

The Celtic symbol made up of three conjoined spirals in rotational symmetry is called Triskelion and means "three legs". This Triple Spiral represents the family as mother-father-child, eternity as life-death-rebirth and past-present-future. It also represents the three Celtic worlds: the spiritual world, the present world and the celestial world.

**The Tree of Life**

It is a representation of harmony and balance in nature. The Tree of Life symbolized strength, a long life, wisdom, and rebirth. The Celts also believed that they actually came from trees, and considered them magical, living beings. Trees were said to guard the land and acted as a doorway into the spiritual world.

**Celtic Knot**

This pattern represents the interconnection of life and our place within the universe. Celtic knots are referred to as endless knots due to the fact that they do not have an end or a beginning. The endless knots represent the eternalness of nature.

**Sailor's Knot**

This design features two intertwined ropes and may have been created by sailors during their long voyages as a means of remembering their loved ones. The Sailor's knot is symbolic of friendship, affection, harmony and love.
